

## Toll surcharge for Groupage service according to the destination

All costs related to toll with validity till 30. 11. 2023 are still included in the transport costs. Toll surcharge is applied based on toll increase change in Germany, Hungary and Czech Republic (it is exactly the difference in toll costs valid from 1. 12. 2023 and the toll costs before this date). Toll surcharge will be updated in case of toll costs change in any country.

Toll surcharge is calculated on top of the transport price. It is calculated as a percentage surcharge from the transport cost according to the valid pricelist.

Percentage surcharge valid for the destination country is the final number including the tranzit countries. Do not calculate the % surcharges for each tranzit country, only the destination country.

Toll surcharge is applied in same amount for export and import direction.

Percentage surcharges below are valid from 1.7.2025
